 East of Rochester, NY via Route 104 and  
 then 1 mile South into the Village of Sodus.

**Bargain Lot 1003A  
 Lot of Phonograph Needles– Diamond and Sapphire**

This lot is a merging of three dealer / distributor inventories done at Sunshine Radio during the 1970's. It consists of new old stock phonograph needles in brands of Astatic, Electrovoice, Pfanstiehl, Transcriber, Recoton, Paegent, and Jensen. There are about 1500 sapphire needles and about 1100 diamond needles in the lot. There appear to also be a few needles for magnetic cartridges. They are sorted in alpha numeric order according to brand in drawers built for needle inventories. An inventory list is available but we do not want to encourage individual needle sales. Internet prices on similar products seem to run between \$8.00 and \$35.00 each for the sapphire and diamond needles with the magnetic versions being higher yet. A conservative internet piecemeal value on this lot would be about \$30,000.00. Due to the constant depletion of the phonograph related items we want to see these products returned to the marketplace but our business cannot give the needed attention to this retail effort at this time. We also have a few separate needle inventories, cartridge inventories and accessories that will appear on other Bargain Lots.

Please review the "Conditions of Sale"

1. Buy the entire lot with a value of \$30,000.00 for \$4,000.00
2. Present an offer on a sub-lot of at least 100 needles that has an acceptable balance between high and low demand items. A specific inventory is available , however the ease of cross reference is very awkward.
